Partitioning

New & Refurbished Hardware

We sell new & refurbished telecom parts from over 300 OEMs & generally save operators 50-80% off of OEM list prices with comparable warranty. We also understand your need for speed when it comes to your order. Our reputation for service and availability are unparalleled. Let CCG Telecom help you achieve your short and long term equipment needs today.

Repair & Replacement

Our state of the art repair facilities can screen and repair Class 5 switching, microwave, base station components and parts from a wide range of manufacturers. Our repair services can offer cost savings of at least 50% off of original manufacturers' repair prices.

CCG Telecom also provides a Advance Replacement Program to keep your systems up and running without interruption in service. We can ship replacement products of equivalent specifications and performance within one business day to provide the most timely and cost-effective solutions for your repair needs.

Engineering & Installation

CCG Telecom facilitates our system sales by offering professional engineering, project management and systems installation to our equipment customers. We provide qualified and manufacturer certified installation for expansions to entire systems. Ask your representative about our quality engineering services today.

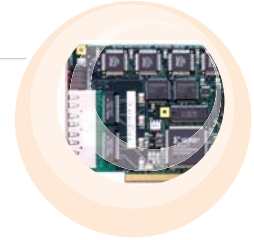

CCG Telecom carries:

Cisco
Natural Micro Systems NMS
Ericsson
ECI Telecom/Veraz Telecom
Nortel
Motorola
Dialogic
Excel
Lucent

And many more...

CCG Telecom asset recovery team helps maximize return on excess or idle telecom assets and surplus networking equipment. We provide transport & warehouse of surplus or junked telecommunications, computer, and/or network equipment at no cost to your company. Our facilities can make quick cash of non or under-performing equipment with tailored marketing strategies for your surplus inventory. CCG Telecom alleviates your responsibility and allows you to run *your* business. By leveraging our extensive global network of resellers and end users, CCG Telecom will help your excess equipment find a home, and turn your liabilities into assets.

De installation

De installed equipment may be transacted as a bid, consignment or liquidation. We have the ability to handle any requirement, either a single piece of equipment or enough to fill a warehouse. Our competency has attracted many businesses that use our services when de installing. With point-to-point management, our logistics team will arrange de-installation, crating, transportation, and liquidation/ consignment.

Liquidation

We at CCG Telecom understand, in these ever changing times, the need for knowledgeable personnel to help your company with Asset Recovery. We will work with your company to regain the highest dollar value on any and all excess telecom & IT assets. Our recovery specialists can travel to your facility and work with you during, what is often, a difficult transition time.

Equipment Consignment

We offer a consignment program to corporations, dealers, end users, and leasing companies looking to sell IT & Telecommunications equipment. We will work with you to maximize your return by marketing your equipment to our customer and dealer base. When space permits, CCG Telecom can offer to buy it directly. Our service is unparalleled at extracting the maximum capital from spare/ outdated equipment.

Recycling

We support Electronics Recycling Initiatives promoting the recovery, reuse and recycling of obsolete electronic equipment, and to encourage the design, manufacture and purchase of environmentally responsible electronic equipment. We adhere to the stringent industry standards regarding the recycling and disposal of all our customers' electronic components.

Termination

We offer more than termination points. We are a service provider for other service providers, offering a mixed portfolio of termination, financial services, and enhanced applications. CCG Telecom is a single point of contact for termination of telephony minutes and a worldwide source for termination rates to specific destinations.

Partitioning

Located in the major international gateway cities and U.S. telecom hubs, our switching sites make it easy for you to interconnect with the service providers that make up your network. CCG Telecom offers T1 or E1 leased ports - with signaling (SS7 or C7), least cost routing, near real-time traffic reports and daily/hourly Call Detail Record (CDRs) downloads. Our switch partitioning services are scalable and customized to suite your specific needs.

CCG Telecom works with over 300 manufacturers to offer customer the broadest range of equipment and solutions:

Cisco VCO

Microwave

Ericsson	SIAE
Harris	Siemens
NEC	Telettra
MRC	DMC
PCOM	

SDH

Alcatel STM-16
Nortel SDH
NEC
SIAE

Base Station (GSM, TDMA, CDMA)

Ericsson GSM RBS 2000
Nokia Talk-Family, UltraSite
Siemens BS 60, BS 240

Some Equipment We Supply:

Wireline

- ATM Switches
- Circuit Packs
- Class 5 local switches
- Frame Relay Switches
- Ring Generators
- MTSO Equipment
- Softswitch / NGN
- Tandem Switch

Wireless

- Base Station
- Base Station Controller
- Cellular Antennas
- Cell Sites
- Complete WiMax Systems
- Cell On Wheels (COWs)
- Duplexers
- Filters
- GSM Gateway
- Radio Amplifiers
- Repeaters
- RF Combiners
- Shelters & Cabinets
- Tower Mounted Amplifiers
- Towers & Support Structures
- Transceivers
- Wireless Analog Switches
- Wireless Digital Switches

Microwave & Transmission

- Channel Banks (T1/E1)
- Converters (T1/E1)
- CSUs
- Systems (DACS)
- Digital Loop Carrier
- Systems (DLC)
- Echo Cancellers
- Microwaves (Licensed & Unlicensed)
- Microwave Antennas & Dishes
- Multiplexers
- Network & Line Interface Units
- Point to Multipoint Radios
- Repeaters
- Transcoders (T1/E1)

Data Networking

- Access Servers
- ATM Switches
- CSU/DSU
- DSLAM
- Ethernet Bridges
- Gateways
- Hubs
- Integrated Access Devices (IAD)
- IP Switches
- Modems
- UPS Systems
- Voip

Test & Measurement

- Oscilloscopes
- Spectrum Analyzers
- Multimeters
- Logic Analyzers
- Signal Generators
- Power Supplies
- Network Analyzers
- Signal Analyzers
- Function Generators
- Waveform Generators
